

Upon final testing, here is a link to SweetLedger's remaining bugs. These bugs, along with the resolved bugs and completed requirements can be found on our Trello board!

Trello Board: <https://trello.com/b/Ktaa1XgR>

Remaining Bugs (Descriptions Below): 4

- Our Ratios math still needs minor tweaking.
- Our "View Expired Passwords Button" on the account management page when the user is an admin is inconclusive at this time. Our system expires passwords every 30 days, and we recently implemented the logic. We are uncertain if it is correct.
- Our Event Logs are almost completely functional, but they do not log some events primarily regarding users.
- There is currently a failure in creating financial accounts in the Chart of Accounts page as an Admin.

Percent Complete: 95%

Based on the itemized requirements list from our Trello board and testing of the software, SweetLedger is 95% functional of all requirements and 95% bug free.

Thank you, Dr. Mamo.

Devin Perry (Team Leader), Matthew Crowley, Kendal Elison, Kahmin Keller, Connor Oberlin
